Election/Restrictions

Upon further examination of the instant claims, it is found that an additional Group needs to be added, to the existing restriction requirement dated 9/24/02 which is still in force and effect ; i.e., claim 14 drawn to isolated Streptomyces. This inadvertent oversight is sincerely regretted.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Groups I-VIII as defined in the previous restriction requirement dated 9/24/02.

Group IX, claim drawn to isolated Streptomyces, classified in Class 435.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VIII and IX are patentably distinct because the compounds can be made by another materially different process or alternatively the microorganism can be used to make different compounds.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1626

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
